Alexander Gallus, MB, BS, FRCPA, FRACP, FRCP(C), is Professor of Haematology at Flinders University School of Medicine, and Deputy Director of Haematology Services for SA Pathology, the state-wide pathology service for South, Australia. Professor Gallus is a physician and pathologist with a long-standing research involvement in the diagnosis, prevention and treatment of venous thrombosis and pulmonary embolism, who did his postgraduate training in clinical trials at McMaster University in Canada. He has an active clinical referral practice specialising in problems of thrombosis and haemostasis. His present research activities centre on international thrombosis treatment trials in collaboration with teams in Europe and North America. He is a member of several international trial steering groups.

Professor Gallus is a member of several national and international scientific and professional bodies, including the Australasian Society of Thrombosis and Haemostasis where he serves as a councillor, and the International Society of Thrombosis and Haemostasis (ISTH), for whom he has just served as a member of the scientific organising committee for the present XXth ISTH Congress. He has published extensively in the field of thromboembolic disorders and has acted as a referee for several journals including Thrombosis Research and the Medical Journal of Australia. Professor Gallus was also the Chairman of the writing committee involved in the development of the Australasian Society of Thrombosis and Haemostasis Consensus Guidelines for warfarin use, published in 2000.
